IN THE CLAIMS:

Kindly amend Claims 2-12 and 14-16 as follows:

2. (Amended) A resin-reinforced silicone  
 [The] composition [of Claim 1] curable by exposure to  
radiation in the electromagnetic spectrum, exposure to  
moisture and combinations thereof, comprising:

(a) a polyorganosiloxane with reactive  
groups selected from the group consisting of photocurable  
groups, moisture curable groups, and combinations  
thereof;

(b) a [wherein the] silicone resin [is]  
 formed as a reaction product of [the] at least one silane  
 within the formula  $\text{R}_m^1\text{R}_p^2\text{Si(X)}_{4-(m+p)}$  I, and at least one  
 other silane within the formula,  $\text{R}_n\text{Si(X)}_{4-n}$  IV, wherein R

may be the same or different and selected from the group consisting of hydrogen, C<sub>1-12</sub> alkyl, C<sub>6-18</sub> aryl, C<sub>7-18</sub> arylalkyl, C<sub>7-18</sub> alkylaryl, haloalkyl, and haloaryl, X is a hydrolyzable functionality, and n is an integer from 0 to 3; and

(c) a cure catalyst selected from the group consisting of a photoinitiator component; a moisture curing catalyst, and combination thereof.

Claims 3, 4, 6, 7, 9-11 and 14-16, change "Claim 1" to --Claim 1 or 2--.

5. (Amended) The composition of Claim 1, wherein the polyorganosiloxane is within the formula:

12. (Amended) The composition of Claim 11, wherein the reactive diluent is a member selected from the group consisting of vinyl-terminated polydimethylsiloxane, vinyl[-]terminated silicone resin, and combinations thereof.

#### REMARKS

Claims 1-23 are pending in this application, with Claims 1 and 2 being independent.
